◆ NO DATABASE EXISTS ANYWHERE — HANDLED BY AI VISION (already live)

Top Trumps (all themes) — <i>proven: identified "Spider-Man — Top Trumps Marvel"</i>	AI ID	K-pop photocards (BTS, NewJeans...)	AI ID
Dead TCGs: Harry Potter, WoW TCG, Chaotic, Duel Masters, Star Trek/Star Wars CCG...	AI ID	Cigarette / tobacco-era & Victorian trade cards	AI ID
Movie / TV / comic cards (vintage Star Wars, Marvel Fleer/SkyBox, GPK)	AI ID	Weiß Schwarz, Vanguard, FaB, indie TCGs (until catalogs added)	AI ID

These get identified & described by AI world knowledge, graded by the vision pipeline, and honestly labeled "no market data exists" — no competitor does better here, and most invent prices instead. Next build (free): a visual-search index of ~80k catalog images so textless/foreign cards match by artwork alone, offline.

Totals: \$0 spent to date · ~\$17 first month (€10 Ximilar + \$6 PriceCharting) = trained grading + all sports coverage · ~\$6/mo steady state until volume · ~\$100–140/mo at real user volume · marginal cost ~8–10¢/graded scan vs ~25¢ market price.
